

Traffic & Commute Survey

A summary of responses on commute habits, flexibility, and preferred strategies for reducing traffic impact.

At a Glance

Key participation metrics across all survey respondents.

14

Carpool Yes

Out of 15 respondents; only
1 maybe, 0 no.

9

Staggered Times

9 yes · 4 maybe · 2 no (n=15)

27

Work From Home

Can WFH at least sometimes,
out of 41 respondents.

8

Would Try Concept

8 yes · 6 maybe · 1 no (n=15)

Morning Schedule Flexibility

Of 34 respondents who provided a schedule answer, the majority report some flexibility — but a significant share remain constrained.

How Flexible Is Your Morning?

Key Takeaway

53% of respondents report schedule flexibility, creating a real opportunity for staggered departure programs. However, **41% are not flexible** — any solution must accommodate fixed-schedule employees too.

📄 Total respondents: 34

Preferred Commute Strategies

Respondents selected from 8 methods. Results reflect total selections across 23 respondents with at least one strategy chosen.

Method

Top Strategies at a Glance

Staggered Departures & Rotating WFH

10 selections each — the clear joint favorites. Flexible timing and remote options top employee preferences.

Neighborhood Carpools & Social Nudges

8 selections each — community-based and behavior-driven approaches show strong appeal.

Corporate Staggering & Vans

7 and 4 selections — employer-led scheduling and shared transport have moderate but meaningful support.

The Path

Forward
Strong employee preferences to carpooling, flexible schedules, and remote work signals a clear opportunity to reduce commute congestion through targeted, people-first programs.

Carpool

14 of 15 said yes

WFH

27 of 41 can work remotely

Stagger

9 yes, 4 maybe on flexible times

Open to Change

8 yes, 6 maybe on new concepts
